Customer Reviews

I own three books filled with house plans so far: 1295 best-selling, lowe's best-selling and lowe's ultimate book of home plans. All three are fantastic. High recommend. Tons of plans in great detail. Big and heavy book, but you wont find much better. Many plans also include a front view of the finished house and the pages are large enough to see the details in the plans.

I enjoy looking at home plans and dreaming of when I will be building my next dream home. Some many plans/ideas were contained in this book. They were easy to look at in this bound book and the book stores nicely on a bookshelf when you are not looking at it. Book was well packaged and arrived fast.

This is a huge, thick book with many different types of house plans. Some are original, and some are the same floor plans you often see in house plan books. All renderings are front-view only and are black and white drawings. The main problem is that many of the exterior renderings don't match

the floor plan. As you hone in on a home you like, you may notice that the floor plan you're looking at is not the plan that matches the front elevation rendering. That said, enjoy browsing the book but know it's probably not where you want to look if you're seriously thinking about buying plans. The publisher did not put much effort into ensuring accuracy or correct information. There are much better books out there for the same price.

This is a fine book of house plans, but they were all for more traditional homes. My brother wants to build a modern mountain home in Colorado, and none of these plans would have been appropriate for him.

This book has an ENORMOUS number of plans, which can be overwhelming. Wish it had more colored plans and/or pictures though.

Most of the plans we saw were online on one site or another. If you're good at searching online, don't waste your money.

Really liked some of the plans. We are just now starting to look at plans, and this covers a wide variety.
