Customer Reviews

Attached to this review will be a silent flip-through of the entire coloring book so you can make an informed decision as to whether or not it will work for you. Rather than discuss how this is like or different from the various movies other than to note that images have been used from all six episodes thus far, I will discuss only how I feel about it as an adult coloring book. The book is filled with portrait studies of various character and a lot of kaleidoscope style mandalas. The mandalas generally have a single repeating element from movies (robots, ships, weapons, etc.) What I found missing and would have liked would have been some stand-alone studies of the Death Star and the Millennium Falcon and other ships and vehicles. While I missed those, it doesn't detract from the overall large selection of Star Wars designs to choose from. My favorite characters were all well represented and as I enjoy coloring mandalas, I will have a lot of fun with those, too. The designs range from simple and open (especially many of the mandalas) to complex with intricate design elements (character portraits, especially.) This presents a nice range for me to color depending on

the mood I am in that day. The book has a nice heavyweight cardboard cover (front and back) which makes for a great solid surface to color on. The designs are printed on both sides of the page and the paper is not perforated. The binding is sewn rather than glued, so removing it takes only a few snips with a small scissor on a few pages. There are only four designs which span across two pages. The rest of the designs are all single page with lots of room around the edges so that nothing is lost in the binding.
