Customer Reviews

Excellent book, particularly if you already play another instrument and don't need a lot of handholding. Accurate, to the point, no nonsense. A relief after stumbling through happy talk "dummies" style books. Nice overview of specialty harmonicas, too, like chord and bass models.

A lot of help getting me started so I felt I was doing more correctly than guessing my way through. Made everything go faster and I felt like I was getting somewhere. A good resource with clear information that is usable. I think its worth the money.Happy Harpin.ANS

Good music reading lessons . A step above what I expected . I only have a 260 and learned more than expected . Awesome! Eve I understand these explanations on music.

Of five harmonica books I have, this is the only one that provides a chart listing the different Hohner chromatic harmonicas ALONG WITH THE NOTE NAMES CORRESPONDING TO THE HOLES.

This feature alone makes it my go-to book when I practice everyday. Knowing which notes come from which hole (blow and draw) will allow me to play almost any solo part in any key. On .com you can "open" the book and see the chart. This is what sold me on the book, and I would have paid the asking price for this chart alone.

Good for beginners on the chromatic

good reading lots of info good book

My husband really made use of this book, and is enjoying learning to play his harmonica.

Bought as a gift. I think its fine.
