## Customer Reviews

The image on [this page](#) (which is also the label on the product) clearly shows rounded off corners, but the actual product has sharp square corners. I specifically bought the 6x6 as opposed to the 8x8 and 12x12 for this feature so that I could make a baby-safe book of family pictures for my infant daughter. I suspect that at one time the image on the label was of the actual product, but that the manufacturer switched to a cheaper square cut without updating the label. Now I will have to find a way to modify the book myself. I would not have purchased this product if accurate images were shown.

These blank books make it easy to design your own board books. Kids can have so much fun participating in the process, and it's great to be able to customize something to read to them. The pages on the books are matte, making it easy to use just about any type of writing or coloring medium on them.

We have made several books for our son and as presents for friends. We use photoshop to create the illustrations and text, then print them out on sticker paper. Trim the stickers to size and apply. Voila, a glossy finish that is more durable.

I've been making board books for my son out of these and I love them. Here's a link to the product once I made a board book with it: [...]I've got one for his favorite toys, and I'm going to be adding one for people he knows.

I could find only two blank board books (both on ) and the only difference between them is the size. They're both square--a difficult format to work with--the the board is a very poor quality and has a slick surface that doesn't take pencil very well. I'm making a book for each of my grandchildren and would have preferred both a better surface to work on and a better quality of board. Still--these seem to be the only ones available.

These are sturdy with decent binding - i was looking for more glossy pages like a regular board book - these feel more papery / cardboardy. But that probably makes it more conducive to not smearing ink and stuff - but I wanted the glossy pages. Note the 14 pages includes the front and back covers.

Bought four of these to make my son some picture books because his favorite things right now are books and pictures of his family; why not incorporate the two! These blank board books are exactly what their advertised as 6x6 square, which means they have edges.

This well-made blank board book is perfect for creating your own personalized book. I used mine to make a book for my 18m year old - gluing in photos of his toys in them so he could learn the words when looking at items he actually recognized. So far it has held up to his demands, but I am quite careful with it to make sure he doesn't bend the cover back on itself etc. I would love to make a new one of these every year for him. If intended for adult use I am sure this has all the quality that you will need. A great idea for gifts, too.
